kicked off the current system				
In November 2018, Minister Lisa MacLeod announced a new exemption/ clawback system. In October 2019, the new Minister Todd Smith, decided not to implement this system. If it had, those on OW would have been slightly better off up until earning \$501/month. Then, worse off, and also kicked off when earning \$1,278/month already. Who could live with \$1,278/month?
